## ALOPECIA FORMULAS

<b>Finasteride</b>	Blocks production of the male hormone dihydrotestosterone, the main cause of male pattern baldness.
<b>Spiroinolactone</b>	Acts as an antiandrogen in human sebaceous glands, competing with DHT receptors and producing a decrease of DHT.
<b>Minoxidil</b>	Hair growth stimulant suggest that minoxidil works by activating PGHS 1 (prostaglandin endoperoxide synthase-1) which helps promote hair growth.
<b>Retinoic Acid</b>	Has been shown to increase percutaneous absorption , it is probable that the increased absorption caused by retinoic acid increases the amount of minoxidil reaching the hair follicle cells.

✓	60ml Apply AM & PM—Available in Lotion or Scalp Solution	
	<b>Minoxidil 5%</b>	\$75.00
	<b>Minoxidil 5% • Retinoic Acid 0.025% Solution</b>	\$85.00
	<b>Spiroinolactone 5% • Finasteride 0.2% Solution</b>	\$95.00
	<b>Minoxidil 5% • Retinoic Acid 0.025% • Finasteride 0.2%</b>	\$105.00
	<b>Minoxidil 5% • Azelic Acid 1% • Retinoic Acid 0.025% • Finasteride 0.2%</b>	\$120.00

\* If you are just starting to use minoxidil containing Retinoic Acid, apply solution only once during first week, twice only during second week, etc., until you have acclimated to it.
